TAKE  
CRAVE AWAY

**GRAB-N-GO!**

Food | Sales Support | Equipment | Marketing

The **Hot Take Program** offers unparalleled restaurant-quality products with the flexibility, versatility, and convenience to help you compete for your share of the breakfast and lunch business!

During peak hours, display an assortment of sandwiches in a warmer, **hot and ready to go**, to help drive those crucial Grab-N-Go sales and profits. During non-peak hours, display sandwiches in a refrigerated merchandiser to give your customers the option of heat on the spot or take to go.

Offering both hot and cold product provides the flexibility and convenience your customers appreciate, helping you maximize your sales.

## GRAB-N-GO SANDWICHES

### Fresh Taste. Made Fast.

Hot Take Craveaway Sandwiches are the ultimate solution for those on the move! Crafted with the finest ingredients and bursting with flavor, our sandwiches are the perfect option for customers seeking a quick, yet satisfying bite!

### Variety & Convenience

From hearty breakfast options to anytime favorites, our menu has something to satisfy every day part.

Conveniently packaged and ready to enjoy straight from the warmer, these sandwiches offer unbeatable taste and convenience in every bite. Say goodbye to hangry and hello to culinary bliss!

**Digital Menu Boards**

Digital menu boards can help increase the value of the brand and value to the retail customers by promoting more sales through the latest technology.

Our partners at Menuetta will facilitate Digital Menu Boards with Management via Cloud Systems and Equipment; LED TV Screens & Installation per customer needs. The following digital menu boards are the core designs for The Hot Take™ Program.

To operate the cloud-based digital menu board system, we have included the following:

- Cloud-based content management system (CMS)
- Amazon Cloud Services with real-time backup
- Amazon database, storage and content delivery
- Content creation and customized program-specific operator content
- Necessary support for deployment and on-going tech support
